

## Wireless Incontinence Management Alarm Solution *IntelWIMS AP-24*

*Enhance Situational Awareness and Alarm Response Effectiveness*

*One Platform... Multiple Integrated Applications  
Customized, Scalable, Integrated Data Management in One Solution*

**IntelNett Real-Time Wireless Device Alarm Management Capability provides - Flexible and Scalable Applications**

### **IntelWIMS**

**An Incontinence Breakthrough - With Immediate and Long-Term Benefits**

### **IntelNett Real-Time Wireless Incontinence Management**

- Detection of incontinence events
- Instantly alerts caregivers of event location
- Specially designed transmitters
- Soft, absorbent, disposable Moisture Sensing Liners (MSL™)
- Aids in wound care management
- Various visual and audible alarm viewing options

#### **IntelWIMS Solution:**

- **Reduce Costs**-Save on linens, laundry and facilities maintenance.
- **Save Time** - Removes the need for unnecessary bed checks, increase staff productivity and maintenance by pre-empting incontinence episodes.
- **Improve Quality of Care**- Enhance situational awareness; increase patient comfort and dignity. Assists with better wound care, keeping residents and bedding dry.
- **Increase Facility Confidence** - Increase superior image of quality care and attract new residents. Inspectors and patient families experience an environment free of incontinence odors.

*"We have taken our incidence of skin breakdown from 23% to 0% by utilizing the IntelWIMS system. Here's an objective marker of superior care!" ...D.O.N. 206 Bed SNF*

Low Profile, Water Resistant  
Wireless Transmitter and  
Moisture Absorbent Liner

#### **IntelWIMS AP-24**

#### **Wireless IntelWIMS Solution**

- Hospitals
- LTAC
- Skilled Nursing Facilities
- Assisted Living Facilities
- Memory Facilities

## Flexible and Scalable Applications - Customized to meet facility requirements

**IntelNett™**  
Wireless Alarm Management

**IntelWIMS**  
Wireless Incontinence Protection Components

**Alarm Communication Options**

Add multiple Annunciation Panels to hallways for Increased Situational Awareness

**Room 406 A**

**Upgrade to Hallway Digital Marquee**

- Annunciation Panel and/or upgraded Dynamic Viewing Station provides central station view and digitally notifies and increases patient situational awareness
- Empowers additional staff to respond more quickly to specific Incontinence prevention needs
- Easily installs at nurse station or end of hall location
- Wireless technology works CyberMedix Moisture Absorbent Pads
- Upgrade to Data Management system for additional Device, FALL and Wandering / Asset Tracking Capability**

**Nursing Station**

AP-24 /32 Viewing Station

- Blue Alarm LED Strobe
- 24 Red LED Alarm Lights
- Room Number
- Device Type
- Audio Alarm
- Wall Mounted Panel - Self Supervising System

Add Additional Devices to expand Situational Awareness Solutions

- IV Pump
- Ventilator
- Fall Pads

**Wireless Transmitter & Moisture Absorbent Pad**

Room 101

**Wireless Transmitter & Moisture Absorbent Pad**

Room 103

**Wireless Transmitter & Moisture Absorbent Pad**

Room 105

**Wireless Transmitter & Moisture Absorbent Pad**

Room 107

**Wireless Transmitter & Moisture Absorbent Pad**

Room 109

Hallway IntelNett Panel

**Add-on wireless system functionality:**

- Wireless Fall Protection (IntelFALL)
- Resident Wandering
- Ventilator – Pulse Oximeter - IV Pump
- Etc. Alarm Management

Medical economics studies indicate a typical 100+ bed long-term care facility loses \$100,000 a year to the cost of incontinence management.

*“With IntelWIMS, we have one less reason to worry. Our patients are dry and cared for and our pressure ulcer incidence is down significantly”*

### IntelNett Wireless Robust Capability

#### Upgrade Capabilities:

- Add Wireless Fall Protection (IntelFALL)
- Add IntelNett data management, reports, digital paging notification
- Upgrade to multiple device alarm capability, i.e. IV pumps, etc
- Integrates to Nurse Call system with IntelNett Nurse Call Manager

#### Plug & Play! - Easy to Install:

- No costly infrastructure to setup or maintain
- IntelWIMS simply attaches to a wall
- Comes equipped for 10 patients, scalable up to 24
- Small wireless transmitters attach to Moisture Absorbent Liners

IntelFall is a component of the IntelNett Integrated Family of Wireless Patient Data Management Solutions – Add:

#### IntelSTAT:

Wireless Device Management Solution

#### IntelFALL:

Wireless Fall Protection Solution

#### IntelNCS:

Wireless Nurse Call Solution
